ABOUT ME

I am a 16 year-old originally from Ukraine, currently living in Espoo, Finland. I have skills in programming, which I'm improving by studying first year double degree (vocational school and upper secondary high school) in Business College Helsinki.

Achievements

- Developed several small but functional games with Unity, which helped me learn the principles of game mechanics and optimization.
- Created responsive websites and applications using React and NextJS, gaining experience in code structuring and using APIs.
- Acquired basic knowledge of server-side development and built backends with ASP.NET, including working with databases and managing server resources.
- Participated in group projects that improved my teamwork skills and experience with version control systems like Git.

I'm also part of the NordPlus project, where we're learning about entrepreneurship and sustainable economics. The project includes two project weeks in Helsinki and Copenhagen.

EDUCATION

2025 - Present

BUSINESS COLLEGE HELSINKI

- Game Development Degree
- Upper - secondary school

2019 - 2026

TECHNICAL LICEUM NTUU "KPI"

VYSHHOROD, UKRAINE
